

HR 677: Digital HR and People Analytics

Course Description:

This course helps MSHR students to become more digital and data-driven. It helps them navigate the complexities of the HR technology landscape and think about how to use HR technology to improve employee experience. Specifically, the course covers: 1) Introduction to Artificial Intelligence in Human Resources and the Future of Work. 2) Creating a Digital HR Foundation. 3) Using Assessments for Talent Identification. 4) Culture and Mindset Change in a Digital Era. 5) The Data-driven (people analytics) and Digital HR Business Partner, and 6) How to select and use digital employee assessments.

* This course has been designed to align with HR competencies identified by the Association for Talent Development (ATD), HR Certification Institute (HRCI), Bersin by Deloitte, the Association for Human Resource Development, and the Society for Human Resource Management (SHRM) for Graduate HR Curriculum Guidelines.

Learning Objectives:

Upon the completion of this course, learners will be able to:

1. Be fluent in understanding what the impact of Artificial Intelligence is on HR and how the Future of Work is impacting our lives.
