### **Target**

# SUSTAINABLE RESEARCH

# CLIMATE ACTION

We shall manage our estate operations, teaching and research activities so that the carbon emissions from their undertaking will have a minimum contribution to climate change, and enable the University to cope with the future impacts of climate change. We shall achieve this through reduced consumption, space usage policies, increased ef ciencies, sustainable travel policies, behaviour changes, technological implementation, and proactively adapting for climate change.

### Target

# RESPONSIBLE CONSUMPTION AND PRODUCTION

Proactively utilising its size and inf uence for good, the University will drive the sustainability agenda forward through undertaking positive impact investments, engaging and challenging its suppliers, and radically reducing its own environmental impacts through minimised resource consumption and waste creation.
